RetailEdge Named 2023 FrontRunner for Retail POS Systems

Release Notes / Updates · https://retailedge.com/docs/2023-frontrunner-for-retail-pos-systems

Rutland, Vermont- May 23, 2023

RetailEdge announced today it was named a FrontRunner in the category "Retail POS System" software by Software Advice. FrontRunners are designed to help small businesses evaluate which software products may be right for them.

From RetailEdge:

"*Thank you to our wonderful customers who have left us their honest and thoughtful reviews, which helped us bring our affordable, robust point of sale software into mainstream. Thank you to our wonderful team of dedicated Sales and Technical Support staff for continuing to create the best user experience possible for our customers for past 34 years!*"

RetailEdge is a full-featured point of sale and inventory management software installed locally on your computer, giving you the freedom of owning your own data with the option of cloud backups. Developed in 1989, RetailEdge was made for retailers, by retailers. Many POS's now are created by some bank or credit card company fronting as a POS, but really just want your credit card processing and don't care about giving you real features or functionality.

FrontRunners is published on Software Advice, the leading online service for businesses navigating the software selection process. FrontRunners evaluates verified end-user reviews and product data, positioning the top scoring products based on Usability and Customer Satisfaction ratings for small businesses. FrontRunners for Retail POS System software is available here.
