# Bulk Updating Costs and Pricing in RetailEdge’s Inventory and Purchase Orders

Inventory Management · https://retailedge.com/docs/bulk-updating-costs-and-pricing-in-retailedges-inventory-and-purchase-orders

We have received a number of questions about how to bulk update inventory and purchase order costs in RetailEdge due to increase manufacturer pricing (for many reasons including the upcoming tariffs). There are a number of ways to easily do this in RetailEdge and here are a few to consider.

## Importing New Pricing

With RetailEdge's import feature you can easily import new inventory pricing from a CSV file.  During the import you can select to change the pricing on the Purchase Order as well.  You can find out more about this in video below.

## Editing Matrix Parents

If you are just changing pricing on an entire style of item, you can easily change the pricing on the sizes and colors, by editing the matrix parent.  More information on creating matrices (items with styles) can be found in the video below.

## Negative Discount a Purchase Order.

If you are changing the cost and price on a purchase order item, you can find out more about how to create a negative discount and the advantage of creating purchase order here.
