RetailEdge 2025.04.0 Release Notes

This is a major release that adds many new features, including new discount rules and reports, and a number of performance and stability improvements. It also fixes and makes improvements to existing features.

New Features

1. Added a Pre-Buy discount rule - Buy Today, Use in the Future (e.g., Coffee or Pet Washes).
2. Added a Discount Triggered by Quantity Total, Amount Off discount rule (e.g., Buy $10 - $19.99, Get $1.00 off).
3. Added fractional percent support for Discount Triggered by Quantity Total discount rule.
4. Added Drag and Drop Reordering of Touch Buttons on the Quicklist.
5. Added an Available Daily Supply report that shows how many days supply available for an item. (Qty_OnHand/(Qty_Sold/Number of Days)).
6. Added a Compound Sold by Item Report. Report displays Sold by Month with On-Hand, Vendor Part Number and Item ID without Department, Class, Vendor grouping.
7. Added a Reorder - Sales - Grouped by Stock Number Report.
8. Added event driven synch cycles to RECON Cloud. RECON Cloud will now check local and cloud data chances and begin cycles when activity/data changes are detected. This will significantly speed up synchronization for Cloud users.
9. Added a Discount Rule Name Filter to the Sales with Coupons Report.
10. RetailEdge now remembers maximized state of all forms and screens.
11. Added Datalogic Magellan 9550i with single cable scanner/scale certification.
12. Added OPOS support for scanners.
13. RetailEdge now requires typed confirmation response when changing the Shopify Key Field.

14. Changed the default key mapping field to ItemID in Shopify and Octopus Bridge.
15. Added better trapping for CR, LF, CRLF on Description field imports.
16. RetailEdge now hides Serial/Activity tabs on Saved Sale Manager.
17. Added a “None” option for labels in Workstation Settings.
18. Added features when saving items that help multi-location businesses and Island workstation users prevent cross-editing.
19. Added a warning about Windows 10 - End of Life (EOL) on October 14,2025. It will be here before you know it.
20. Added a new option to update inventory prices on PO REDI imports.
21. Added better error messaging for relay timeouts on Cloud Load Balancing Server
22. Added an Email Filter to Customer Sales Summary Export.
23. The Closing Summary Report now prints a closing when the sales session has NO sales.
24. Added a button to fetch Octopus Bridge locations needed for new installs.
25. PICS Grid now refreshes to allow users to instantly see when a scanned item is not found or has errors.
26. RetailEdge will no longer allow payments higher than $99,999,999.00.,
27. Server Connection Settings Refresh Rate no longer hides columns in Managers and Lists.
28. RetailEdge now displays a message when Receipt Printer 1 and the Reprint Printer do not match.
29. Added fixes to help prevent Transfer Order cross edits.
30. Renamed the report section Include/Sort Order to Include/Grouping to make it clearer what these selections do in the reports.
31. RetailEdge now allows you to manually issue negative amounts to a gift card.
32. Added description of how the Combo Search works in the Help File.
33. Improved the Startup Error Message if the Ret_Users table is damaged.
34. Updated references to Global Payments in Workstation Settings.
35. Updated Copyright references.
36. Added Logging to API Server to better track API client activity.
37. Improved the Table Resync Utility with a new phase two synch check.
38. Improved reports to make the grouping, sorting and filters available with each report clearer.

39. Refreshed RECAP Interface to match latest RetailEdge look.
40. Added Total Weight text to receipt language files.

Fixes and Improvements

1. Fixed the Traditional sales screen minimum sale price warning displayed when selling $0 items.
2. Added timer validation to RECAP Applications (0-999 Minutes).
3. Corrected Customer Rewards Program status calculations for different purchase starting dates and exclusions.
4. Added validation extremely large numbers in Workstation Settings label printer slip.
