RetailEdge 2025.11.0 Release Notes

This is a major release that adds many new features, including price modification features, reports, performance, security, and stability improvements. It also fixes and makes improvements to existing features.

New Features

1. Added an option on the Price tab of the Inventory editor that will update/copy prices from an inventory item to unreceived POs and receiving.
2. Added checkbox to allow for not updating item pricing when receiving a purchase order.
3. Added Price Updater Wizard that will allow you to change inventory item pricing by a fixed percentage (Tools-Global Change).
4. Price Calculator and VAT Price on Editor with VAT now works with Tax Jurisdiction Exceptions.
5. Added a new Sales Export - Sales - By Location with OnHand Quantities.
6. UI Changes to Customer Editor to make sales screen notes popup consistent with inventory notes.
7. You can now Export to Grid the items on the Customer Manager Items tab (right click)
8. Added Default Quantity and new Weight Units to Inventory Import/Exports.
9. Added Dynamic Cost value to Inventory Import/Exports.
10. Added the ability to set the weight units for an item via imports.
11. Global TSYS integration now requires returns to be tied to the original transaction for refunds and returns (not blind). Returns need to be made to the card associated with the original transaction.
12. Added an option to have total product weight at the bottom of tape style receipts.
13. Added Email OAuth2 SMTP Authentication (more secure) for Microsoft Outlook/Exchange and Google Gmail.
14. Added Notify on PO pop up notes for vendors (e.g., notify of credit memos, order only online, etc.). When changing vendors on existing POs you can append, replace, or leave the notes as they are.

15. Added the ability to right-click Grids and export view to a CSV or TXT file.
16. Added Filter Groups into filter mechanism on Customer and Inventory Manager. This allows you to have more complex OR type filters to be created with groups. For instance, find all customers who have a State of VT or State of FL and Last Name “Smith.”
17. Added fractional quantities support to Shopify Integration through Measura App.
18. Reorder reports now have the option to include the Allocated Quantity in the On Hand calculation so that they show Available quantity.
